

The Messy Magpie

Home Learning Challenges

In the story 'The Messy Magpie', Morris realises he needs to take the rubbish to a recycling centre. Recycling centres recycle things like glass, cardboard and plastic. Have a look in your fridge and cupboards at home. Can you find something made from glass, cardboard or plastic?

Paper and cardboard can be recycled and turned into new paper. What can you see in your home that is made of paper or cardboard? Which food packets are made of paper and card?

Recycling is when you make something new out of things you don't want anymore. Can you take some empty packets, boxes and plastic containers and build an amazing model? You could stick it together with tape.

The name Morris begins with an 'm'. So does 'magpie' and 'messy'. What does your name begin with? Can you think of other words that begin with that letter?

Morris is taking 5 plastic bottles and 3 cardboard boxes to the recycling centre. How many things is he taking altogether? You could draw a picture to help you work out the answer.

We can also recycle old clothes by giving them to someone or taking them to a clothing bank. Are there any clothes that don't fit you anymore? Maybe you could give them to someone smaller or take them to the clothing bank?
